

# Liquid Life

## Huge Flowers Recipe

ALL VALUES ARE PER GALLON

### rooted cuttings - 18 or 24 hours of light

	grow	bloom
week 1	1.3ml	1.3ml

### vegative stage - 18 hours of light

	grow	bloom	bud fuel
week 1	5.25ml	2.65ml	
week 2	8ml	4ml	
week 3	10.5	5.25	10ml

### flowering stage - 12 hours of light

	grow	bloom	bud fuel	blossom blaster	carbo max	monster bloom	final flush
week 1	2.5-5ml	5.25ml	10ml		1g		
week 2	2.5-5ml	5.25ml	10ml	0.4g	1g		
week 3	2.5-5ml	5.5-10.5ml	10ml		1g	1.2g	
week 4	2.5-5ml	5.5-10.5ml		0.4g	1g	1.2g	
week 5	2.5-5ml	5.5-10.5ml	10ml		1g	1.2g	
week 6	1.3-2.6ml	5.5-10.5ml	10ml		1g	1.2g	
week 7	1.3-2.6ml	5.5-10.5ml	5ml		1g	1.2g	
week 8							8ml

Manufactures recommended hydroponic formula

For liquid life grow & bloom during flowering they suggest a range (see week 3)

If your plants are healthy use the full amount, if plants are struggling use smaller amount  
Just be sure to keep the ratio the same ie. week 3 - use 2.5 grow & 5.5 bloom or 5 grow & 10.5 bloom

This is a good recipe for the "feed, feed & flush" method in soilless mixes
